EXPERIENCE

ICIMS, INC., Holmdel, New Jersey

Software Engineer, 2022-2024

- Built and Maintained iCIMS Core ATS, including feature development, support case resolution, and implementing additions to legacy software to decrease the frequency of future support cases or data infractions.
- Development of a microservice for abstracting cross-cutting concerns for processing a batch of tasks
- Resolved PII data issues for customers with more than 300,000 potential data infractions.
(SQL, HQL, Java)
- Documented data trends blocking accurate reporting from testing frameworks, and initiated redesign of testing structures covering iCIMS core applicant tracking software.
(Java WebClient, Zephyr Scale)
- Developed features for iCIMS core ATS used by companies with more than 200,000 employees.
(Java, Mockito, JUnit, Hibernate)
Analyze and fix issues reported by customers
- Handled high-impact conflicts for recurring customers, resulting in increased ROI.
(Spring Boot, MapStruct, Docker, PostgreSQL)

TATA CONSULTANCY SERVICES, Edison, New Jersey

Software Engineer, 2021-2022

- Owned a suite of forms for the upkeep of stock used by more than 100,000 employees.
(Angular, TypeScript, Jest)
- Crafted CRUD operations for full-suite database interactions.
(JavaScript / SQL)
- Worked with a small team to create a suite of forms used by customers for the upkeep of employee stock tracking.
